SUMMARY

Built dynamic, responsive web applications and created seamless user experiences with efficient code. Graduated from UIN Jakarta in 2022 then worked at a photocopy shop while learning web programming from scratch including HTML, CSS, Javascript. Joined Eduwork ReactJS/NodeJS bootcamp, focusing on the MERN Stack including libraries and frameworks like Next.js, Tailwind, Redux. and Have built fullstack MERN projects, REST APIs, Todo List, Fetch Public API. Skilled in MS Office, especially Word and Excel since high school. Committed to advancing my web programming career and continuously exploring new technologies.

PROJECT EXPERIENCE

MERN

Feb 2024 – May 2024

- This project utilizes the full MERN stack, including data storage in MongoDB or MySQL, a backend REST API built with Node.js and Express.js, and a frontend developed with React.js. Each data set is displayed in a grid system and table.
- The project is developed in multiple versions. The first version implements a single product table model with CRUD operations through HTTP requests (GET, POST, PUT, PATCH, and DELETE). Subsequent versions feature multiple table models with relationships between tables, and include authentication and authorization, searching, filtering, sorting, image upload via Cloudinary, and a responsive, dynamic design.
- The development of this project is currently 85% complete, as there may be additional versions with new features in the future.

Todo

May 2024 – Jun 2024

- This project implements CRUD operations (Create, Read, Update, and Delete) and stores data in the browser's local storage.
- The project is developed in four versions, each with identical functionality but built using different tools. The first version utilizes only basic tools, while the other versions incorporate additional libraries such as Redux and Zustand for state management, and Notistack, React-Hot-Toast, and Sonner for notifications.
- The development progress of this project has reached 95%. Despite appearing complete, there is a possibility that additional features will be added in the future.

PublicApi

May 2024 – Jun 2024

- This project retrieves data from several public APIs, such as movie data from OMDB API, anime data from Jikan Anime, and article data from Jsonplaceholder or DummyJson, among others.
- Each data set is displayed in a grid system and table, where detailed views of each entry can be dynamically accessed. The project also features data searching, filtering, and sorting capabilities, along with animation effects using Framer Motion.
- The development of this project is approximately 70% complete, as additional public APIs will be integrated.

Hadinalmusri School

Jan 2024 – Mar 2024

- This is a website project for Hadinalmusri School in Pagaden Subang, operating solely on the client-side. It displays information including the profile, editorial team, advertisement information, gallery, contact, and career opportunities. It also features a dark mode.

- The development of this project is currently at 70%, with plans to develop the backend in the future.

CERTIFICATION & BOOTCAMP

Eduwork.id

Yogyakarta, (Online)

ReactJS & NodeJS

Aug 2023 – Now

- **Website, basic programming, and git.** Mastered how to start to code and where to save source code. Result: 15 % for 20 days, using VsCode, HTML, CSS, Bootstrap, Git, GitHub.
- **Basic Javascript, OOP, and Asynchronous.** Enhanced a simple interactive web page and fetch data API. Result: 29% for 25 days. using HTML, CSS, Javascript, Insomnia.
- **ReactJS, Redux, NodeJs, Express.** Mastered how these technologies work. Result: 48% for 1 month and 15 days. Utilizing ReactJs, Vite, Axios, Redux, NodeJS, ExpressJs, Insomnia.
- **Mysql, Mongodb, and Rest API.** Mastered how CRUD operations worked in Rest API and handled errors. Result: 71% for 25 days. using Mysql, MongoDB, ReactJs, and ExpressJs.
- **E-commerce with auth.** Developed an e-commerce project that provides various features. Result: 100% for a month and a half. using MongoDB, ExpressJs, ReactJs, and NodeJs.

Udemy

Bandung, (Online)

Ultimate Microsoft Office

Aug 2021 – February 2022

- **Microsoft Word, Document Formatting, and Styling.** Mastered how to create, format, and style documents professionally, including using templates, headers, footers, and referencing tools. Result: 20% for 15 days, utilizing Microsoft Word 2019.
- **Microsoft Excel, Data Analysis, and Visualization.** Enhanced skills in data organization, analysis, and visualization, including using functions, pivot tables, and charts. Result: 35% for 20 days, using Microsoft Excel 2019.
- **Microsoft PowerPoint, Presentation Design.** Developed skills in creating professional presentations with transitions and animations. Result: 50%, using Microsoft PowerPoint 2019.
- **Microsoft Access, Database Management.** Mastered database creation and management, including running queries. Result: 65% for 15 days, using Microsoft Access 2019.

EDUCATION

Syarif Hidayatullah State Islamic University

Jakarta

Bachelor Degree (S-1) - Arabic Language and Literature

Sep 2016 – Sep 2022

GPA 3.84

- Subject *Tarjamah Arobiyah ila Indunisiyah* and *Tarjamah Indunisiyah ila Arobiyah*, improved typing skill up to 92 WPM.
- Subject *Ijaz al-Quran* improved logical thinking.
- Book Report of Field Study and Community Service as a Secretary. Gathering, compiling, and editing reports from other members.

SKILLS, INTERESTS, & LANGUAGES

Technical Skills : ReactJs | NextJs | ExpressJs | NodeJs | MongoDB | Tailwind | Shadcn | Bootstrap | Html | Css | Javascript | Typescript | Redux | Zustand | Prisma | Framer Motion | Cloudinary | Vercel | Vite | Microsoft Office

Soft Skills : Open Minded | Work Ethic | Flexible | Critical Thinking | Good Attitude | Emotional Intelligence

Interests: Vue | Angular | NextJs | React Native | Flowbite | NextJs

Language : Indonesian (Native) | Sundanese (Proficient) | English (Intermediate) | Arabic (Intermediate)

PROJECTS

MERN

Feb 2024 – May 2024

Details : Utilizes the full MERN stack and implements CRUD operations through HTTP requests.

Tools : Bcrypt | Cloudinary | Freesqldatabase | Jwt | Mongoddb | Mysql | Mongoose | Multer | Notistack | Railway | React | React-hot-toast | Redux | Sequelize | Shadcn | Sonner | Tailwind | Typescript | Zustand

Link : <https://github.com/mkhotamirais/tamimern>

Demo : <https://tamimern.vercel.app/>

Todo

May 2023 - Jun 2024

Details : This project implements CRUD operations and stores data in the browser's local storage.

Tools : React | Tailwind | Shadcn | Typescript | Zustand | Redux | React-hot-toast | Sonner | Notistack

Link : <https://github.com/mkhotamirais/tamimern>

Demo : <https://tamimern.vercel.app/v0-todo>

Public Api

May 2024 – Jun 2024

Details : Fetching data from multiple public APIs and displaying it in a grid layout or table.

Tools : NextJs | React | Tailwind | Shadcn | Typescript | Zustand | DummyJson | FakestoreApi | Jsonplaceholder | JikanAnime | NewsApi | Reqres | Sisko | Tmdb

Link : <https://github.com/mkhotamirais/tamipublicapi>

Demo : <https://tamipublicapi.vercel.app/>

Hadinalmusri School

Jan 2024 – Mar 2024

Details : Showcases data retrieved from public APIs, including Jsonplaceholder, OmdbAPI, etc.

Tools : Front-end: React, Redux, React-router-dom, Tailwindcss, React-Icons.

Link : <https://github.com/mkhotamirais/hadinalmusri>

Demo : <https://hadinalmusri.com/>
